Project reference

Capital/403998/CWA/Pittenweem

Our alliance partner, Caledonia Water Alliance will be carrying out this work on our behalf.

30th October 2025

Taking care of your sewer network in your area.

What we are doing

We are taking care of the wastewater services in your community. Further to previous site investigation works carried out in May this year in West Shore, we require to carry out some additional investigation work. This work involves taking some core samples from the sea wall at the existing chamber in West Shore which we were unable to do in May. Please see over leaf for location details.

When are we doing it

Work is planned to start on Monday 10th November 2025 for approximately 1 day.

What happens next

- This work will require some minor construction activities in and around the West Shore area at the existing CSO chamber and sea wall.
- Any working areas will be made safe at all times during the work.
- Local Access along West Shore will be maintained, and pedestrian access will be maintained at all times.
- Our contractors Corecut are carrying out this work on our behalf and will do all they can to keep disruption to a minimum.
